WORK EXPERIENCES

Freelancing

Web Developer

09/2024 - Present

- Created a company profile landing page for a creative agency called ESYR that can help their clients to see past works of the agency.
- Created a company profile landing page for an Aluminum Company called ATA Aluminum that can help their customer to see available service and products.

PT. Global Loyalty Indonesia (Alfagift)

Backend Developer

09/2023 - 09/2024

- Created a backend service for an internal company application that allows users to request usage from their yearly department budget. The backend service also accommodates the approval process of said usage from the staff level until the CEO level.
- Created backend service for an internal company application that allows marketing departments to create voucher and promotion campaigns for new followers of the Alfagift application.
- Created backend service for an internal company application that helps the General Affairs Department in managing monthly office resources acquisition. The service also includes approval process from the requester, their manager, and from the General Affairs Department themselves.
- Created a backend service to allow an internal company application to upload an excel containing list of items to be inputted to the database for reporting purposes.
- Created a backend service for an internal company application that handles voucher and promotions connected to certain budget usage,

where users need to determine the status of the voucher or promotion if it is valid or not.

- Developed Visual Studio Code snippets to help a more efficient development process. As a result, development time is reduced by 40% and thus gives more time for testing.

PT. Multitech Infomedia (Geniora)

Web Developer

09/2021 - 09/2023

- Created and maintained wordpress pages for the company landing page
- Created and maintained an in-house wordpress plugin. The plugin helps in managing banners and images used for promotional purposes in the pages.
- Implemented changes to help the SEO of the company profile website.
- Implemented google analytics to the website for ads purposes.
